## **EXECUTIVE SUMMARY**

This Public Involvement Plan has been updated from the 2009 Public Involvement Plan for the U.S. Army Corps of Engineers by UXB International, Inc. to serve as a framework for public involvement during project activities conducted at the Former Cape Poge Little Neck Bomb Target Munitions Response Site, the Former Moving Target Machine Gun Range Munitions Response Site, and the Tisbury Great Pond Munitions Response Site, all of which are located on Martha's Vineyard.

As part of the Defense Environmental Restoration Program for Formerly Used Defense Sites Program, U.S. Army Corps of Engineers is at this time conducting the Remedial Investigation to characterize the nature and extent of Munitions and Explosives of Concern and impacted environmental media related to military training conducted at Martha's Vineyard during World War II. Project activities will be conducted using land and marine geophysical surveys, and intrusive investigation by qualified Unexploded Ordnance technicians at all three of the Formerly Used Defense Sites. The project activities will also include environmental sampling of surface water, groundwater, sediment, and soil for analytical testing for the presence of military related substances such as metals and explosives.

This Public Involvement Plan describes the communities affected by the project, identifies interests and concerns expressed by representative community members, and outlines public involvement activities to be implemented by U.S. Army Corps of Engineers.

In response to identified concerns and to ensure public involvement throughout the project, the U.S. Army Corps of Engineers, New England District, with assistance from the U.S. Army Engineering and Support Center, Huntsville, and UXB International, Inc. will brief community leaders, distribute pamphlets, news releases, and other public education materials and display project material at the community library.

## **1.0 INTRODUCTION**

As part of the Defense Environmental Restoration Program (DERP) for Formerly Used Defense Sites (FUDS) Program, the U.S. Army Corps of Engineers USACE is at this time conducting a Remedial Investigation (RI) to characterize the nature and extent of Munitions and Explosives of Concern (MEC) and impacted environmental media related to military training conducted during World War II at three sites on Martha's Vineyard, Massachusetts. The three sites include the Former Cape Poge Little Neck Bomb Target Munitions Response Site (MRS), the Former Moving Target Machine Gun Range MRS at South Beach and the Tisbury Great Pond MRS. Project activities will be conducted using land and marine geophysical surveys, and intrusive investigations by qualified Unexploded Ordnance (UXO) technicians. Additionally, project activities will also include environmental sampling of surface water, groundwater, sediment, and soil for analytical testing for the presence of military related constituents such as metals and explosives.

### **1.1 PURPOSE OF PUBLIC INVOLVEMENT PLAN**

The purpose of the Public Involvement Plan (PIP) is to identify public concerns, to keep the public informed of project activities on an ongoing basis, and to provide a meaningful, open, and proactive communication exchange that affords the major stakeholders the opportunity to be involved in the decision-making process as appropriate. This PIP is an updated version of the one used during the Time Critical Removal Action (TCRA) activities conducted in 2009 for the U.S. Army Corps of Engineers (USACE) by UXB International, Inc. (UXB). The PIP identifies issues of community concern related to the Cape Poge, South Beach, and Tisbury Great Pond munitions related projects. It is designed to meet the unique requirements of the local community and provide the framework for community involvement in the environmental activities that will be performed at the Former Cape Poge Little Neck Bomb Target MRS, the Former Moving Target Machine Gun Range MRS at South Beach and the Tisbury Great Pond MRS. This PIP will serve as a framework for successful information exchange with the public during project activities. This plan discusses the use of news releases, pamphlets, user groups and interaction with elected officials. This PIP is a living document that may be revised throughout the duration of the project to address concerns of the community and involvement activities.

### **1.2 OBJECTIVES OF THE PIP**

This PIP is being developed to achieve the following objectives:

1. Ensure that stakeholders understand that personal and property safety are the paramount concern during MMRP activities at the three MRSs.

2. Serve the community's information needs by keeping local residents, officials, and other stakeholders informed in a timely manner of MMRP project activities.
3. Provide local residents, officials, and other stakeholders with project documentation through the Administrative Record.
4. Encourage and enable the public to stay informed.
5. Listen to and capture public concerns.
6. Adapt planned actions where public comments or concerns have merit.
7. Foster and maintain a climate of understanding and trust between stakeholders and the project team.

## 2.0 PROJECT AREA DESCRIPTION

The following section describes the settings and histories of each of the three MRSs, the nature of impact to public health being addressed by the project activities and regulatory agencies involved in these sites.

**Figure 2-1. Location Map**

The Former Cape Poge Little Neck Bomb Target MRS consists of approximately 141 acres on Little Neck and Cape Poge Beach on Chappaquiddick Island in the Town of Edgartown, Massachusetts on Martha's Vineyard. The target is located at Latitude N 41.41956 and Longitude W 70.45169. The location of the Cape Poge Little Neck Bomb Target MRS is approximate and may be adjusted as new information becomes available. The Former Cape Poge Little Neck Bomb Target MRS is part of the Cape Poge Wildlife Refuge. Cape Poge can be reached by traveling over the Dyke Bridge on Chappaquiddick Island or by private boat. Cape Poge is owned and managed by The Trustees of Reservations (TTOR).

The Former Moving Target Machine Gun Range MRS at South Beach consists of approximately 264.3 acres and is located along the southern shore of Martha's Vineyard, south of Edgartown, Massachusetts. Due to extensive beach erosion, the former range is now thought to be

approximately 150 yards off South Beach. South Beach is managed by the Commonwealth of Massachusetts, Department of Resource and Conservation (MassDCR) and managed by the Edgartown Parks and Recreation Department from May 1 through Labor Day of each year.

The Tisbury Great Pond MRS is located on the southwestern portion of Martha's Vineyard. The area consists of approximately 496.7 acres of water, including many coves, with the island's shoreline forming the southern edge. The MRS is almost evenly divided between the towns of West Tisbury and Chilmark.

## **2.1 SITE HISTORY**

### **2.1.1 FORMER CAPE POGE LITTLE NECK BOMB TARGET MRS**

Prior to 1944, Chappaquiddick Island and Cape Poge were used for agricultural purposes and as a summer resort. The United States acquired four leasehold interests in approximately 141 acres beginning 1 July 1944. The leases were acquired by the Department of the Navy for the purpose of a bombing target in connection with the first Naval District flight-training program at Naval Air Station Quonset Point, Rhode Island and Naval Auxiliary Air Station Martha's Vineyard, Massachusetts. By 1959, Charles S. Bird and Oliver D. Filley had donated most of Cape Poge to TTOR who currently owns and manages the property. The refuge is open to the public for recreational use, such as hunting, canoeing, kayaking, fishing, clamming, and crabbing. Military practice ordnance, including Mk23 practice bombs, have been observed on the property.

### **2.1.2 FORMER MOVING TARGET MACHINE GUN RANGE MRS AT SOUTH BEACH**

The Department of the Navy leased approximately 264.3 acres for military training at South Beach. The gunnery range was used by Naval Air Station Quonset Point, Rhode Island for aerial machine gun and rocket firing practice. An observation bunker, an oval shaped target and other support features were constructed within a few yards of the ocean. A large portion of the beach has eroded since 1947. The beach has high tourist usage from mid-June through Labor Day and swimmers have been coming into contact with rockets ranging in size from 2.5 inch up to 5 inch on the bottom of the ocean floor.

### **2.1.3 TISBURY GREAT POND MRS**

In 1943, 496.7 acres of land were acquired by lease and condemnation at Tisbury Great Pond, Martha's Vineyard, Massachusetts to serve as a dive bombing and strafing range in support of the fighter training program of Quonset Point Naval Air Station. During the initial operational period of the range, strafing and masthead targets were constructed on the range, at which student pilots could hone their gunnery and bombing skills utilizing .30 caliber ammunition, .50 caliber ammunition, and several practice bomb types. By the end of World War II it is surmised

that ordnance activity ceased on the Tisbury Target Area. However, the target area was reinstated in March 1947 for practice bombing use by the carrier fleet at Newport, Rhode Island. A masthead target was constructed about midway on the beach between Tisbury Great Pond and the ocean for use by the fleet. The Navy then suspended its bombing program on Tisbury Pond and the target was removed from the area in June of 1947. All three leases were terminated on or before June 1947. Following site closure and land transfer, the Tisbury Great Pond developed into a shellfish harvest area, remaining under state control. The barrier beach area was subdivided into numerous parcels of beach recreation area and sold to numerous private landowners.

## **2.2 NATURE OF POTENTIAL IMPACT TO PUBLIC HEALTH**

The presence of munitions poses potential public health hazards associated with residential, recreational and agricultural use.

### **3.0 COMMUNITY BACKGROUND**

The following section includes a description of the community in the project areas, a chronology of community involvement, and a summary of key community concerns identified during previous community interviews. Due to previous munitions response actions at the sites, the community has received significant exposure to the FUDS program and has familiarity with the site and munitions present.

#### **3.1 COMMUNITY PROFILE**

The area encompasses portions of the County of Dukes County, Massachusetts. The County of Dukes County consists of 11 islands off the southeast coast of Massachusetts, within sight of Cape Cod. The population of Martha's Vineyard is around 15,000 in the off-season and over 100,000 in the summer months. Martha's Vineyard is a popular international tourist destination.

The average household size is 2.3 people with a median annual income of \$56,515 (2008). The average age is 41 years and the racial demographics include Caucasians (91%), while African American, American Indian, Asian and others comprise the remainder (9%) of the population (U.S. Census Bureau, 2000). Tourism is the major industries of Dukes County.

#### **3.2 KEY COMMUNITY INTERESTS AND CONCERNS**

Based on TTOR Management Plan for the Cape Poge Wildlife Refuge, many types of sensitive habitats are present including numerous state-listed rare species of plants and birds, and are therefore a key interest of the community. Additional community interests and concerns are:

- Avoid, minimize and/or mitigate potential environmental impacts;
- Incorporate adequate environmental protection measures into the RI/FS Work Plan to the maximum extent practical;
- Public health and safety;
- Reduce the risk of exposure to Munitions Constituents (MC), MEC, and explosive hazards at all three sites.

## **4.0 PUBLIC INVOLVEMENT HIGHLIGHTS**

This section provides a description of the specific public involvement activities and methods of communication proposed for Martha Vineyard. It presents a systematic program for keeping federal, state, county, and local elected officials, as well as user groups, informed of the project status and findings through a communication network. In addition, resources available to the community and key individuals are listed, along with areas of special community sensitivity. This PIP is designed to meet the requirements of Engineering Pamphlet (EP) 1110-3-8 for Public Participation in the Defense Environmental Restoration Program (DERP)-FUDS.

### **4.1 PUBLIC INVOLVEMENT OBJECTIVES**

The PIP is the framework for on-going communications between the public and USACE personnel involved with the Martha's Vineyard project. The following sections detail objectives developed into guidelines, which should be implemented in Martha's Vineyard public involvement activities.

#### **4.1.1 INFORM AREA RESIDENTS, MEDIA AND LOCAL OFFICIALS OF THE MMRP PROJECT ACTIVITIES AND THE ROLE OF USACE**

Not all area residents, local news media, and other public entities are familiar with the RI/FS and response action processes, or the role of USACE. Information will be provided to enhance community understanding of the RI/FS process and the personnel involved in the project. In light of the culturally unique and sensitive factors at Martha's Vineyard, the USACE, CENAE office will facilitate a communication program with the public and provide project updates to keep all informed. Appendix A lists the media outlets to be used during the duration of this project and Appendix B provides the available meeting locations. Additionally, Appendix C provides the Community Interview Question Sheet, and Appendix D provides the Name, Address, and Phone Numbers (if available) of personnel that will be contacted.

### **4.2 PUBLIC INVOLVEMENT ACTIVITIES**

Public involvement activities will be conducted throughout the various stages of the investigation and cleanup for this project. USACE has undertaken and continues to engage in activities to strengthen involvement and communications with stakeholders during the RI/FS process.

#### **4.2.1 PRESS RELEASE**

Prepared statements will be released to the local newspapers, radio stations, and television stations to announce the start of the project, the objective of the project, periodic updates during the project execution of significant findings at each MRS during the process and to notify the

community of any public meetings or public comment periods. Press releases will be sent to those on the media list in Appendix A. Press releases will be placed in the Administrative Record and/or the Administrative Record File for the project.

#### **4.2.2 PAMPHLETS**

Pamphlets containing specific project information will be developed and distributed at the beginning of the remedial investigation fieldwork and throughout the investigation process as deemed necessary. The pamphlets are intended to provide the community with important information about the projects. Copies of all pamphlets will be placed in the Administrative Record and Administrative Record Files for the project at the Edgartown Library, the West Tisbury Free Public Library and at the USACE, New England Office, 696 Virginia Road, Concord, Massachusetts 01742. Additionally, all contract personnel will possess pamphlets to provide to the public.

#### **4.2.3 PUBLIC MEETINGS**

A minimum of two sets of public meetings (two at Edgartown and two at West Tisbury) will be held during the project. The public meetings will be held both at Edgartown Town Hall and West Tisbury Council on Aging. The meetings will provide the general public opportunities to participate in the process as required and review project documents. A "Preliminary Public Meeting" will be conducted prior to initiation of RI activities. This meeting will involve discussions of the historical use of the MRS areas; previous investigations, and the proposed remedial investigation activities. A "*Post Remedial Investigation Public Meeting*" will be conducted after the completion of the RI activities. The purpose of this meeting will be to provide the public and stakeholders with the information and conclusions based on the results of the RI and to discuss the upcoming FS. Additional public meetings may be held if warranted.

#### **4.2.4 INFORMATION CONTACT**

CENAE will serve as the main point of contact to receive and respond to requests for information on the Martha's Vineyard MMRP activities at Cape Poge, South Beach and Tisbury Great Pond, and to coordinate the implementation of this plan. The CENAE Public Affairs Office and the project coordinator's name, telephone numbers, and mailing addresses will be prominently displayed in all site publications and advertisements published by the lead agency. The CENAE Project Manager will play an active role in providing project related information to the public. CENAE's mailing address and phone number will be displayed on all public notices, pamphlets, updates, and other correspondence.

#### **4.2.5 ADMINISTRATIVE RECORDS**

A Project Administrative Record will be developed and kept on file at the Edgartown Library, the West Tisbury Free Public Library and at CENAE, 696 Virginia Road, Concord, Massachusetts 01742. This file will contain project documents to include but not limited to the PIP, Daily Log Records, the RI/FS Final Reports, and Photographic documentation of work performed. These documents will be made available to the public as non-circulating reference materials. Documents will be provided to the repository by mail. The repository location is provided in Appendix E. Appendix F provides the contact list of key community leaders and interested parties.

## **APPENDIX C**

### **Community Interview Questionnaire Sheets**

Name: See Attached Sheet

Address:

Telephone (H): \_\_\_\_\_ (W): \_\_\_\_\_

1. A FUDS Remedial Investigation/Feasibility Study (RI/FS) is being conducted at Cape Poge, South Beach, and Tisbury Great Pond on Martha's Vineyard, MA. Have you heard about this study? If so, do you remember when and how you learned of it?

2. Have you talked with any Corps of Engineers, state, or environmental officials about the ongoing FUDS RI/FS project? (circle one) Yes No

3. If you have, were they responsive to your concerns or questions?

4. What special interests or concerns do you have about this FUDS RI/FS project and why is this of particular interest or concern?

5. Have any of your friends or neighbors talked with you to express interest or concern about the FUDS RI/FS, and if so, what were their concerns and why is this information of particular interest or concern?
6. If you had a question or concern, what would you do? Is there someone you would call or contact? (For example, 911/Police, Fire Department, TTOR, Local Politicians, etc.)
7. Would you be interested in joining a mailing list to receive fact sheets and other general information about this project? (circle one) Yes No
8. How does the community receive information about local events and news (i.e., radio, television, newspapers)?
9. Other than the mailing list, in what other ways can the Corps of Engineers provide you with information and better involve you in the decision-making process at Cape Poge, South Beach or Tisbury Great Pond? (i.e. newspaper notices, radio/television announcements, Information Repository, Community Hotline, Community Meetings, etc.)
10. How frequently would you like to receive information? (i.e., monthly, quarterly, semi-annually, annually, whenever events warrant, etc.)

11. Can you suggest anyone else (friend, neighbor, group, informal or formal leader) that we should contact or who might want to be included on the mailing list?

12. Is there anything else you would like to mention that we have not talked about? If in answering this question you provide “historical” information, please identify the source of this information.

### **Privacy Act Statement**

*Authority:* 10 U.S. Code (USC) 2705. *Principal Purpose:* To identify the attitudes and concerns of area residents concerning activities at the FUDS HTRW or Military Munitions Response project during the study phase. The requested information will be used to develop a Public Involvement Plan for the specific FUDS project in question. The information will also be used by the Army to develop a mailing list of individuals interested in receiving fact sheets and other general information about the study. Disclosure of the requested information is voluntary. Failure to provide all the requested information may lessen the effectiveness of the public involvement program for the project.
